

# Tru Cubicle

The only true temporary re-usable shower cubicle. A superbly engineered and extremely durable reusable or permanent solution which can be repeatedly dismantled and re-assembled with ease to provide an adapted bathroom in your chosen location.

Easy to install - Minimal survey and installation-can be assembled within 2 hours in any room where water, waste, ventilation and power are provided. Typical installation takes approximately 2 days..

## The most watertight and easy to access

The raised outer lip of our unique shower tray surrounds the entire cubicle to fully prevent any leakage. Our 'Advantage' shower doors also feature unique air assisted hinges. You simply press a small lever and the door is lifted clear of the shower tray lip so that it can swing open easily and once closed, a gentle push down secures the doors in position to provide the most watertight seal.

## Easy to refurbish and re-use

The combination of hard wearing rigid high-pressure laminate panels and its modular construction allow for repeated re-assembly with minimum refurbishment. You simply replace the drainage components, door seals and if required, service the shower unit.

## A compact fully contained unit

The 1200 x 1000mm cubicle is 1850mm high and comes complete with a choice of electric shower, handrail, ceiling light/extractor fan. Gravity or pumped drainage is available and the drainage trap is housed beneath the shower tray. Shower seats and wheelchair ramps are also available. For full specifications see below.

- Fully fitted easy to clean toilet cubicles made to fit individual needs and preferences.
- Safe, hygienic and comfortable.
- Complete with handrails, lights and extractor fan.
